

# 16 *Short Topics in* System Administration

---

*Jane-Ellen Long, Series Editor*

## A System Engineer's Guide to Host Configuration and Maintenance Using Cfengine

Mark Burgess and Aileen Frisch

## About SAGE

SAGE is a Special Interest Group of the USENIX Association. Its goal is to serve the system administration community by:

- Offering conferences and training to enhance the technical and managerial capabilities of members of the profession
- Promoting activities that advance the state of the art or the community
- Providing tools, information, and services to assist system administrators and their organizations
- Establishing standards of professional excellence and recognizing those who attain them

SAGE offers its members professional and technical information through a variety of programs. Please see <http://www.sage.org> for more information.

## *Contents*

### **Acknowledgments v**

- 1. Introducing Cfengine 1**
  - 1.1 Fundamental Concepts 3
  - 1.2 Cfengine Components 7
  - 1.3 Getting Started 8
- 2. Cfengine Policies: Under the Hood 13**
  - 2.1 Action Sequence Rule Types 15
  - 2.2 Cfengine Classes 32
  - 2.3 Filters 37
  - 2.4 Policy Ordering and Execution 40
- 3. Building a Cfengine Infrastructure 42**
  - 3.1 Roadmap for Centralized Policy 42
  - 3.2 The cfrun Command: Simulating Push with Pull 49
  - 3.3 DHCP and Dynamic Addresses 51
  - 3.4 Dealing with Firewalls 53
- 4. Some Case Studies: Sample Policies 58**
  - 4.1 Managing a Laptop Computer 58
  - 4.2 Web Server 60
  - 4.3 A Site Policy File Suite 64
  - 4.4 Gathering Data from Many Hosts 77
- 5. Extending Cfengine: Modules and Methods 78**
  - 5.1 Modules 78
  - 5.2 Methods 79
  - 5.3 Example: Generating the Password and Shadow File 82

- 6. Host Monitoring and Anomaly Detection 86**
  - 6.1 Autonomic Computing 87
  - 6.2 Alerts: Some Basics About Warnings 87
  - 6.3 The cfenvd Daemon 88
  - 6.4 The ShowState Function 90
  - 6.5 The Cfenvgraph Utility 91
  - 6.6 FriendStatus Alerts 93
  - 6.7 File System Scans 96
  - 6.8 Interpreting Anomaly Results 97
  - 6.9 Patterns and Anomalies 104
- 7. The Cfengine Management Process 105**
  - 7.1 Process Requirements 105
  - 7.2 Revision Control and Rollback 106
- Index 109**
- About the Authors 114**

## *Acknowledgments*

The authors would like to thank all of the people who have made contributions to this booklet. First, we thank our excellent team of technical reviewers: Chaos Golubitsky, Edward F. Brown, Jason Heiss, and Jeremy Mates. Their very careful reading of the manuscript for this booklet has made it much better. We also thank Kyrre Begnum and Laura Villa for input and pointing out some problems. Finally, we thank all of the members of the cfengine community for their ongoing support and encouragement in the project and in general. Any errors that remain are our own.
