

Acknowledgments

The authors work for VMware and INXi. The opinions expressed here are the authors' personal opinions. Content published was not read or approved in advance by VMware and does not necessarily reflect the views and opinions of VMware. This is the authors' book, not a VMware book.

Thank you to my good friends Duncan Epping and Steve Kaplan for making this book an enabler for virtualization advocates and those interested in learning more about VMware virtualization. Thank you to Daniel Conde for material reused and updated for this edition. Thank you to my VMware management team (Peter Giordano, Director; Enis Kouuk, Senior VP; Steve Herrod, CTO) for supporting me on this and other projects.

Thank you for other contributors and reviewers of this work. These include Phil Anthony, Ryan K. Baker, David Baldwin, Matthew S. Barnes, Mark Burgess, Philip Callahan, Ken Cline, Richard Damoser, Girish Manmadkar, Andrew Mitchell, Craig Risinger, Rupen Sheth, Lee Dilworth, Ben Lin, and Ken Brady.

Thank you to Jane-Ellen Long for her editorial support in making this a reality. Thank you to the USENIX Association for inviting me for this second VMware Infrastructure Short Topics booklet and for inviting me to participate in the virtualization track at USENIX/LISA conferences since 2005. USENIX continues to hold a high standard for both the research and administration aspects of system administration.

A special thanks to my family and friends for support of this project and the time spent.

I dedicate this book to Amy, Catherine, Sofi, Lila, Mom, and Dad, whose love and support have gotten me through the weekends, nights, and holidays to complete this project.

This book is also dedicated to virtualization advocates around the world!

John Y. Arrasjid
VCDX, VMware, Inc.
